- <sup>(1)</sup> A reconciliation of GAAP net income to FFO is provided at the end of this press release.

Stuart A. Tanz, President and Chief Executive Officer of Retail Opportunity Investments Corp. stated, "During the second quarter we continued to build on the solid momentum we established during the first quarter. We again posted strong releasing spreads and same-center NOI growth. Additionally, we achieved a new record high lease rate for the company, finishing the second quarter at a very strong 97.9%. We also continued to make steady progress in terms of disposing of non-core properties and with the entitlement process on our densification initiatives." Tanz added, "Thus far we are squarely on track to achieve our stated objectives for the year and look forward to continuing to advance our business during the second half of 2019."

#### FINANCIAL SUMMARY

For the three months ended June 30, 2019, GAAP net income attributable to common stockholders was \$7.6 million, or \$0.07 per diluted share, as compared to GAAP net income attributable to common stockholders of \$7.3 million, or \$0.06 per diluted share, for the three months ended June 30, 2018. For the six months ended June 30, 2019, GAAP net income attributable to common stockholders of \$18.0 million, or \$0.16 per diluted share, for the six months ended June 30, 2018. For the six months ended June 30, 2019, GAAP net income attributable to common stockholders of \$18.0 million, or \$0.16 per diluted share, for the six months ended June 30, 2018.

FFO for the second quarter of 2019 was \$32.6 million, or \$0.26 per diluted share, as compared to \$33.4 million in FFO, or \$0.27 per diluted share for the second quarter of 2018. FFO for the first six months of 2019 was \$69.3 million, or \$0.55 per diluted share, as compared to \$70.5 million in FFO, or \$0.57 per diluted share for the first six months of 2018. ROIC reports FFO as a supplemental performance measure in accordance with the definition set forth by the National Association of Real Estate Investment Trusts. A reconciliation of GAAP net income to FFO is provided at the end of this press release.

Included in GAAP net income attributable to common stockholders and FFO for the second quarter of 2019 was a one-time, \$0.95 million settlement expense in connection with a 2010 property acquisition.

At June 30, 2019, ROIC had a total market capitalization of approximately \$3.6 billion, including approximately \$1.5 billion of principal debt outstanding and an equity market capitalization of approximately \$2.1 billion. ROIC's principal debt outstanding was comprised of \$86.4 million of mortgage debt and approximately \$1.4 billion of unsecured debt, including \$151.0 million outstanding on its unsecured revolving credit facility at June 30, 2019. ROIC's interest coverage for the first quarter was 3.1 times and 94.5% of its portfolio was unencumbered at June 30, 2019 (based on gross leasable area).

#### NON-GAAP DISCLOSURES

Funds from operations ("FFO"), is a widely recognized non-GAAP financial measure for REITs that the Company believes when considered with financial statements presented in accordance with GAAP, provides additional and useful means to assess its financial performance. FFO is frequently used by securities analysts, investors and other interested parties to evaluate the performance of REITs, most of which present FFO along with net income as calculated in accordance with GAAP. The Company computes FFO in accordance with the "White Paper" on FFO published by the National Association of Real Estate Investment Trusts ("NAREIT"), which defines FFO as net income attributable to common stockholders (determined in accordance with GAAP) excluding gains or losses from debt restructuring, sales of depreciable property and impairments, plus real estate related depreciation and amortization, and after adjustments for partnerships and unconsolidated joint ventures.

The Company uses cash net operating income ("NOI") internally to evaluate and compare the operating performance of the Company's properties. The Company believes cash NOI provides useful information to investors regarding the Company's financial condition and results of operations because it reflects only those income and expense items that are incurred at the property level, and when compared across periods, can be used to determine trends in earnings of the Company's properties as this measure is not affected by the non-cash revenue and expense recognition items, the cost of the Company's funding, the impact of depreciation and amortization expenses, gains or losses from the acquisition and sale of operating real estate assets, general and administrative expenses or other gains and losses that relate to the Company's ownership of properties. The Company believes the exclusion of these items from operating income is useful because the resulting measure captures the actual revenue generated and actual expenses incurred in operating the Company's properties as well as trends in occupancy rates, rental rates and operating costs. Cash NOI is a measure of the operating performance of the Company's properties but does not measure the Company's performance as a whole and is therefore not a substitute for net income or operating income as computed in accordance with GAAP. The Company defines cash NOI as operating revenues (base rent and recoveries from tenants), less property and related expenses (property operating expenses and property taxes), adjusted for non-cash revenue and operating expense items such as straight-line rent and amortization of lease intragibles, debt-related expenses and other adjustments. Cash NOI also excludes general and administrative expenses, depreciation and amortization,

acquisition transaction costs, other expense, interest expense, gains and losses from property acquisitions and dispositions, extraordinary items, tenant improvements and leasing commissions. Other REITs may use different methodologies for calculating cash NOI, and accordingly, the Company's cash NOI may not be comparable to other REITs.

#### **Our Company**

Retail Opportunity Investments Corp. (Nasdaq: ROIC), is a fully integrated, self-managed real estate investment trust (REIT) that specializes in the acquisition, ownership and management of grocery-anchored shopping centers located in densely-populated, metropolitan markets across the West Coast. As of June 30, 2019, ROIC owned 89 shopping centers encompassing approximately 10.2 million square feet. ROIC is the largest publicly-traded, grocery-anchored shopping center REIT focused exclusively on the West Coast. ROIC is a member of the S&P SmallCap 600 Index and has investment-grade corporate debt ratings from Moody's Investor Services and S&P Global Ratings. Additional information is available at www.roireit.net.

#### **Supplemental Information**

The enclosed information should be read in conjunction with ROIC's filings with the Securities and Exchange Commission, including but not limited to, its Form 10-Qs filed quarterly and Form 10-Ks filed annually. Additionally, the enclosed information does not purport to disclose all items under generally accepted accounting principles ("GAAP").

#### **Non-GAAP Disclosures**

Funds from operations ("FFO"), is a widely-recognized non-GAAP financial measure for REITs that the Company believes when considered with financial statements presented in accordance with GAAP, provides additional and useful means to assess its financial performance. FFO is frequently used by securities analysts, investors and other interested parties to evaluate the performance of REITs, most of which present FFO along with net income as calculated in accordance with GAAP. The Company computes FFO in accordance with the "White Paper" on FFO published by the National Association of Real Estate Investment Trusts ("NAREIT"), which defines FFO as net income attributable to common stockholders (determined in accordance with GAAP) excluding gains or losses from debt restructuring, sales of depreciable property and impairments, plus real estate related depreciation and amortization, and after adjustments for partnerships and unconsolidated joint ventures.

The Company uses cash net operating income ("NOI") internally to evaluate and compare the operating performance of the Company's properties. The Company believes cash NOI provides useful information to investors regarding the Company's financial condition and results of operations because it reflects only those income and expense items that are incurred at the property level, and when compared across periods, can be used to determine trends in earnings of the Company's properties as this measure is not affected by the non-cash revenue and expense recognition items, the cost of the Company's funding, the impact of depreciation and amortization expenses, gains or losses from the acquisition and sale of operating real estate assets, general and administrative expenses or other gains and losses that relate to the Company's ownership of properties. The Company believes the exclusion of these items from operating income is useful because the resulting measure captures the actual revenue generated and actual expenses incurred in operating the Company's properties as well as trends in occupancy rates, rental rates and operating costs. Cash NOI is a measure of the operating performance of the Company's properties but does not measure the Company's performance as a whole and is therefore not a substitute for net income or operating income as computed in accordance with GAAP. The Company defines cash NOI as operating revenues (base rent and recoveries from tenants), less property and related expenses (property operating expenses and property taxes), adjusted for non-cash revenue and operating expense items such as straight-line rent and amortization, acquisition rosts, other expense, interest expense, gains and losses from property acquisitions and dispositions, extraordinary items, tenant improvements and leasing commissions. Other REITs may use different methodologies for calculating cash NOI, and accordingly, the Company's cash NOI may not be comparable to other REITs.

The Company's Form 10-Q for the quarters ended June 30, 2019 and June 30, 2018 should be read in conjunction with the above information. In connection with the adoption of the lease accounting standard ASU No. 2016-2, effective January 1, 2019, previously capitalized internal leasing costs are now expensed and included in General and administrative expenses. These costs amounted to \$277,000 and \$611,000 for the three and six months ended June 30, 2018, respectively. In addition, bad debt is now classified as an offset to revenue instead of being included in Property operating expenses.

Same centers are those properties which were owned for the entirety of the current and comparable prior year period.
 In connection with the adoption of the lease accounting standard ASU No. 2016-2, effective January 1, 2019, bad debt is now classified as an offset to revenue instead of being included in operating expenses.
 In cludes anchor lease termination fees net of contractual amounts, if any, expense and recovery adjustments related to prior periods and other miscellaneous adjustments.
 Note: Analysis excludes one shopping center that is currently under contract to be sold (slated for new multi-family development).
